

About Eye in the Sky

The Eye in the Sky, Flight Data Recorder has been developed by the industry for the industry.

Manufactured in New Zealand, this aviation certified flight data monitoring tool will increase safety and keep your fleet running to optimum efficiency, all for less than half the price of the competition.

Installed in your aircraft, the Eye in the Sky automatically captures high definition video of the cockpit view and instrument panel along with intercom, radio and ambient audio, GPS and accelerometer data.

Up to 22 hours of data is securely stored onboard the EITS for post-flight review using the custom made software application.

Use your data to investigate in-flight occurrences, solve intermittent engineering faults, debrief pilot training as well as to find definitive answers in the event of an accident.

If a picture is worth a thousand words the Eye in the Sky's high definition video, audio and data is priceless.
